Akash Biswas

AI Engineer II | Portfolio

+91-9434840949 | biswa.akash.ab@gmail.com | akshbswas98 | akashbiswas13 | Kolkata, India

Professional Summary

AI/Backend Engineer with 4+ years of experience building scalable backend and GenAI applications using Python, Java, and cloud-native architectures. Experienced in translating business needs into AI solutions, creating POCs, and contributing to architecture, modeling, and production deployments.

Experience

Generative AI Engineer EY-GDS 04/2026 – Present Kolkata,India

- Building and optimizing generative AI pipelines (RAG, agentic workflows, prompt engineering)
- Working with LLMs (GPT, Llama, Gemini) for automation, summarization, content generation, and data synthesis
- Collaborating with cross-functional teams to integrate Gen AI into enterprise systems securely and at scale
- Ensuring responsible AI practices — including bias mitigation, prompt safety, and governance

Software Engineer – Backend & AI Tata Consultancy Services 08/2022 – 03/2026

- Built GenAI-driven automation tools using OpenAI, Azure OpenAI, LangChain, and CrewAI
- Designed RAG pipelines, vector-based search, and LLM-integrated microservices
- Developed APIs in Python & Java, improving scalability, performance, and async processing
- Deployed solutions on AWS (ECS, Lambda, SQS) and GCP (Pub/Sub, Vertex AI)
- Collaborated with data engineers on data modeling, ML pipelines, and feature preparation
- Used Docker, CI/CD, GitHub Actions, and observability tools (Grafana, CloudWatch)
- Participated in architectural discussions, client interactions, and technical demos

Full-stack Developer Yunicorp 10/2021 – 12/2021 Remote

Web App Developer Anti Corona Task Force 09/2020 – 03/2021

- Created awareness pages for COVID-19 and moderated content using Drupal 8

Education

Visvesvaraya Technological University(VTU) India B.E. in Information Science and Engineering 2018 – 2022

Skills

AI/GenAI: LLMs, RAG, Prompt Engineering, LangChain, CrewAI, LangGraph, Model Context Protocol (MCP)
Cloud AI: Azure OpenAI, AWS Bedrock, GCP Vertex AI
Programming: Python, Java, Node.js, SQL, PySpark (Beginner)
MLOps / Deployment: Docker, Kubernetes, CI/CD, GitHub Actions, MLFlow concepts
Backend: Microservices, Async Programming, Redis, SQS, Pub/Sub, Java Spring Boot, PostgreSQL
Tools: Grafana, Prometheus, Splunk, Terraform (Basic)

Certifications

- Google Generative AI Leader (Oct-2025)
- Oracle Java SE 8 (1Z0-808)
- Github Copilot Certification (June-2026)

Achievements

- TCS AI Igniter Hackathon – Top Entry (2025)
- Xcelerate Warrior Award (2023) – Recognized for backend reliability and AI automation contributions
